

Copenhagen Febr. 20, 1882.

Dear Professor Gray,

I am very thankful for your kind letter; conforming to your wishes I am now preparing the 5 fascicles of flora Danica wanting in your collection, which, after being coloured, shall be forwarded to the indicated library at Göttingen. Of course the colouring of so many plates will take us little time, but I hope notwithstanding, that the whole will be ready for expedition in the first months of the summer 1882.

The amount in German money for the 3 fascicles, which you consent to purchase, will be 110 Reichsmark (each fascicle = 37 R. M.), and (with emballage and sending of the packages) total:
115 R. M.
